He shall not extend their use to other individuals, except his servants upon his business; nor shall they be used for any tolls or consideration to be paid by any person other than the Subscriber, nor does this confer on him the right to use the instrument of another Subscriber.

DIRECTORIES

The Company assumes no liability whatever for damages occurring from errors or omissions in the making up and printing of this book. Subscribers are, however, requested to promptly report to the Business Office, by telephone or in writing, any error which may appear in this issue so that it may be corrected in the next issue.

This Directory is the property of the Company. It is printed for the exclusive use of the Company's patrons and is loaned to its Subscribers. All persons are cautioned against reproducing its contents.

RURAL PARTY LINE INSTRUCTIONS

Always listen before ringing, to ascertain if the line is in use and thus avoid interrupting a conversation that may be in progress.

Before calling a subscriber on your line make sure of his number by consulting the directory, then ring, being careful to make the signal distinct. The signal to give is indicated by the number following the letter "r". The first figure following the letter "r" represents the number of long rings, and the second figure, the number of short rings. For example, to call -r-24, give two long followed by four short rings. Do not press the push-button on your instrument when calling a subscriber on your line.

To call a subscriber on another line, signal the operator and give her the number. To signal the operator, press push-button while ringing.

When conversation is finished, replace receiver and give one quick ring-off. Do not press push-button while ringing off.

Conversation should not exceed five minutes' duration. Bear in mind that while you are using the line other subscribers are unable to do so.

There is a type of Long Distance
service to suit every need

STATION-TO-STATION CALLS

—where you will speak to anyone within reach at the distant telephone

THIS type of call meets most needs and is at the lowest rate. When you can give the distant number, speedy connection is assured. Reduced rates are effective from 8.30 p.m. till midnight; and further reductions from midnight till 4.30 a.m. (Minimum reduced rate is 25c).

There are two principal classes of service. For one type you give the *number* required to the *local* operator and hold the line while connection is established. Points to which this service is available are listed on another page.

To call all other places ask for "Long Distance." Fast service is assured by giving the number of the distant telephone. If, however, you do not know the number, give the name under which the telephone is listed, and the address of the distant subscriber to Long Distance and say "Anyone there will do."

PERSON-TO-PERSON CALLS

—where you specify that a particular person is desired.

BECAUSE of the greater service given you in summoning a specified person to the telephone, this type of call takes a higher rate. In the event of the call not being completed a small charge is made for reports furnished. Only one report charge is made on any one call. If the call is carried over and completed next day, the report charge is waived.

To place a Person-to-Person call ask for "Long Distance" then say "I wish to speak to Mr. Clark, Main 555, Blanktown."

Where the called person is requested to pay for and accepts charges it is called a COLLECT CALL.

APPOINTMENT CALLS

—where a particular person is required at a specified time.

THE rate is slightly higher than the person-to-person rate. The operator makes the appointment with the distant party.

To place an appointment call, ask for "Long Distance" and say to the operator "I wish to speak to Mr. Jones, Number 68 Blanktown at 4.30 p.m., etc."

MESSENGER CALLS

—where the called person has no telephone and it is necessary to send a messenger to summon him to the telephone.

THE rate for messenger service is the same as for Appointment Calls with messenger charge added.

To place a Messenger Call, ask for "Long Distance" and say to the operator "I wish to speak to Mr. Blank, 45 Common Street, Brownville. He has no telephone."

Speedy Telephone Service to nearby points

—give the number to your local operator

To telephone to and from any of the places listed below give the number to the local operator, as on a local call, and hold the line while connection is established. If you do not know the number of the distant telephone, please ask "Information." For example, to call someone at "GEORGETOWN" from BRAMPTON say to the local operator "Georgetown 67" (or whatever the number may be.)

A STATEMENT OF POLICY

IN the development of this company's business of supplying telephone service to the people of Ontario and Quebec, we have been able to so establish the confidence of investors in the enterprise that today there are over 14,400 stockholders, of whom 95 per cent reside in Canada.

This widespread ownership of the Bell Company's shares, together with the fact that competition in the usual sense is not a factor in our operations, imposes a very special obligation upon the management. On behalf of the telephone-using public we are in duty bound to see that adequate and dependable service is rendered them at all times. To the shareholder we are obligated to see that the safety of his savings is assured.

To ensure these two results the only adequate policy in the long run is to furnish continuously the highest grade of service at the lowest cost, consistent with a sound financial structure.

It follows that excessive profits or extra dividends to shareholders can have no place in such a policy. Conversely, as the record of this company shows, the return to the shareholder is limited to a fair, regular dividend, with the opportunity, as new capital is required to extend the system, of making further investment of his savings on favorable terms. Such a policy we believe to be in the interests of both the telephone user and the shareholder.

In short, earnings must be sufficient to ensure both the best possible service at all times and the continued soundness of the enterprise. Less than this in earnings must mean something less than the highest standard of service. Earnings that are more than these purposes demand, must be expended in the enlargement and improvement of the service, or else the rates must be reduced.

To the individual telephone user this margin of safety in earnings is almost negligible. To the telephone company it makes all the difference between, on the one hand, adequate revenues enabling us to carry out our purpose to give the highest standard of service, and on the other, such inadequate return as must result in something less than the best possible service.

A sympathetic appreciation of the foregoing fundamentals of our policy will do much to aid in ensuring a telephone service the standard of which is continually rising, and at a cost to the user as low as a due regard to the stability and soundness of the enterprise will permit.

A Few Simple Suggestions

on rural party-line telephone service

SPEAK slowly, distinctly and directly into the transmitter with the lips about one-half inch from the mouth-piece.

Always make sure of the number before making a call.

Give the operator the number wanted rather than the name.

Before calling, find out if the line is in use. If it is, hang up your receiver promptly.

When you finish a talk, or when you find that the line is busy, or that the person you are calling does not answer, hang up the receiver and give the handle one quick turn.

Answer promptly when you hear your own signal.

Make your calls brief so as to leave the line free. Short conversations will improve the service and make it of most value to everyone.

Do not allow children or others to listen to, or interrupt your neighbour's conversation when he is using the telephone.

Emergencies will arise. If another subscriber desires to make an emergency call, the persons using the line should give it up temporarily.

Complete Telephone Equipment to meet your needs

IN addition to the ordinary equipment, known to every telephone user, many special appliances have been developed. There are extension telephones for the home, office and factory; intercommunicating systems and private branch exchanges to take care of calls between departments of business establishments; special switching apparatus (wiring plans) to provide a flexible system of handling internal and external communications. There are many other refinements designed to fill a definite need and make telephone service still more effective.
